

SHOWY NATIVE PLANTS OF THE WGC HERBARIA

The showiest non-woody (herbaceous) flowering plants noted in the Marybeth Wheeler & Anna E. Carpenter herbaria

Sorted by Scientific Name

If questions, please contact Anne Djupedal Gura

KEY to Columns/Abbreviations:

Type	Herb = herbaceous plant. When type of herb is known: A =annual; B =biennial; E =evergreen (by definition, a type of perennial); P =perennial; A/P =annual/perennial; B/P =biennial/perennial
Common Name	Common name highlighted = a plant that is both showy and high-value for pollinators/other wildlife.
P? *	* = Listed in the appendix “Native Plants with Wildlife and Desirable Landscaping Attributes” in Doug Tallamy's book Bringing Nature Home .
Showy? *	* = Rated excellent for showy bloom (or foliage); <i>blank</i> = rated good for showy bloom (or foliage)
Event Mo #	Month in which the specimen was collected; used here as a stand-in for a plant’s generally-accepted bloom month – b/c the goal was to get as many different plant parts as possibly, so specimen was likely in flower and maybe carrying fruit as well.
Event Date	When the herbarium specimen was collected.
Native?	Yes =native to CT; Y-other = yes, where “other” is the region of the continental US in which that plant is considered to be native
Town	In which specimen was collected.
Symbiota ID	The Consortium of Northeastern Herbaria’s record number for the WGC specimen – one way to look up a WGC specimen online at website NEherbaria.org

APRIL and MAY Herbaceous Natives

Scientific Name	Common Name	Type	P?*	Showy?*	Bloom Mo	Seed Mo #	Height	Conditions	Event Mo #	Event Date	Native?	Town	Symbta ID
